Career objective

- To have a growth oriented and challenging career, where I can contribute my knowledge and skills to the organization and enhance my experience through continuous learning and teamwork

Education

Silver Oak Collage of Computer Applications, Silver Oak University **2022 - 2025**
• Bachelor of Computer Application (BCA) | CGPA: **8.59**

P. J. High School **2019 - 2021**
• Commerce (HSC): **50.57%**

P. J. High School **2018 - 2019**
• G.S.E.B (SSC): **49.83%**

Technical Skill

- **Languages:** Java | HTML | CSS | JavaScript | PostgreSQL
- **Course Work:** Data Structure and Algorithms (DSA) with C | Advanced Java | Database Management Systems (DBMS) | Android Development with Java | OOP | OS | Computer Networks
- **Soft Skills:** Fast and Continuous Learning | Good Teamwork | Problem Solving | Patience

Projects

User Management System

Technologies: Spring Boot, Angular 19, PostgreSQL, Spring security, JWT, REST API

- Implemented secure user authentication using JWT tokens, enabling login, logout, and auto token refresh.
- Developed a refresh token mechanism, allowing users to stay logged in without re-entering credentials.
- Created secure REST APIs for user registration, login, and token validation.
- Stored access and refresh tokens securely in the PostgreSQL database for session management.
- Ensured automatic token renewal, preventing unauthorized access.
- Added search and filtering functionality, allowing users to quickly find specific records.

Student Form with Dynamic Fields & Infinite Scroll

Technologies: Spring Boot, Angular 19, Angular 19, NG Prime, ExcelJS, Pagination, PostgreSQL

- The system allows users to dynamically add fields for 10th and 12th qualifications. As the user selects their qualifications, the corresponding marksheet upload option is automatically displayed.

- The dashboard offers an option to filter data based on gender (Male/Female) and qualification (10th, 12th), helping the admin easily manage and organize the data.
- The admin has the ability to export filtered data into an Excel file. This means that data filtered by gender or qualification (10th, 12th) can be downloaded in Excel format for easier analysis.
- Data is loaded in batches of 10 records at a time, using pagination for smooth navigation. Additionally, the system features infinite scrolling, where more data is dynamically loaded as the user scrolls.

Chat Application

Technologies: Java, Spring Boot, WebSocket, Stomp, Angular

- Developed a real-time chat application using Angular with STOMP over WebSocket, supporting one-to one and group messaging.
- Implemented instant message delivery and receipt updates, ensuring seamless communication with a responsive UI.

Certification Course

- NPTEL: Introduction to Internet of Things
- C Programming Essentials Bootcamp
- SQL Essentials Bootcamp
- DSA Essentials Bootcamp

Language

- English | Gujarati | Hindi

Declaration

- I hereby declare that all the details mentioned above are in accordance with the truth and fact as per my knowledge and I hold the responsibility for the correctness of the above-mentioned particulars.
